

We offer solar plastic injection molding and green solutions to reduce your environmental footprint. Discover our sustainable practices and get a quote!

We specialize in high-precision plastic moulds tailored for new energy applications, delivering robust and reliable solutions for components used in electric vehicles, solar energy systems, and energy storage ...

Discover high-precision new energy die casting moulds for EVs, solar & energy storage systems. Durable, ISO 9001-certified moulds from a trusted Shenzhen manufacturer.

With 30 years of industry expertise, we specialize in solar junction boxes, connectors, wiring harnesses, and custom electro-moulding solutions that power the future.

FOW Mould is a highly-rated manufacturer of solar panel components. Providing several injection molding services, we offer one-stop solutions to all solar power parts needs. Implementing a ...

Injection molding in renewable energy means producing precise plastic parts for solar, wind, and battery systems. Molded components cut weight, resist corrosion, and repeat quality at scale.

A dedicated company specialized in the research and production of a Solar Sail. The main products of this company include certain products for Solar Sail, Ruimo, Zhimo.

Our highly skilled team can work with you to design, develop, and manufacture plastic components that meet the specific requirements of your solar products, whether it's solar racks, mounting systems, or ...

The SRM process uses CSP / Concentrated Solar Power to achieve any desired molding temperature, and often with cycle times less than ordinary rotomolding. Contact us to learn how we can help ...
