

The Republic of Seychelles has launched construction of a 5.8 MW floating solar power plant to reduce its reliance on imported petroleum products. The Public Utilities Corporation (PUC) ...

By harnessing solar power, Seychelles is taking a proactive step toward a more sustainable and resilient energy future. The project is expected to save approximately 2 million liters ...

With commissioning planned for 2026, the Seysun Lagoon project will play a pivotal role in helping Seychelles achieve its goal of sourcing 15% of national electricity from renewable energy ...

To date, affordable and effective solar and battery storage systems have opened up new possibilities for the archipelago, particularly in its high-end tourism sector.

The use of solar photovoltaic (PV) systems is gaining increasing popularity in Seychelles. Small to medium sized consumers are installing grid-tied photovoltaic systems on their roofs.

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

Seychelles has launched construction of its first utility-scale floating solar power plant, a 5.8MW project in the Providence Lagoon on Mahé Island. It is expected to play a pivotal role in ...

Seychelles is a model island nation for solar adoption, with clear government direction, ample sunshine, and a strong need to replace imported diesel. From eco-resorts on Praslin to municipal rooftops in ...

The solar energy systems, donated by the Chinese embassy in Seychelles, will provide clean, renewable energy to the Curieuse Marine Park. Once operational, the project will reduce ...

The much-anticipated 5MW Floating Independent Power Producer (IPP) Photovoltaic (PV) project in the Providence Lagoon is poised to commence in the coming weeks, following the ...
