

Solar battery cabinet investment projects under construction

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy projects currently ...

The project is expected to avoid 419 million pounds of GHGs annually, which is equivalent to removing 44,000 gas-powered cars from the road for one year or planting 3.1 million trees and growing them ...

Signed into law on July 4, 2025, the One Big Beautiful Bill Act (OBBBA) introduces the most consequential federal policy shifts we've seen in years for commercial solar and battery storage projects.

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to power 850,000 homes for four ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

A groundbreaking solar and battery storage initiative has officially commenced operations in Mojave, California, marking a significant step forward in the renewable energy sector.

The company will use the capital raised from these transactions to fund construction of two utility-scale, stand-alone battery storage facilities, the Atlas VII and Atlas IX projects, located in La Paz ...

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

By combining 430 MW of solar generation with 340 MWh of storage, Cold Creek will make the Texas grid stronger and more reliable for years to come. We are proud to bring Bechtel's experience to this ...

California already has the most utility-scale battery storage systems nationwide but it is about to set a new record. According to developer Intersect Power, the company aims to build the...
