

HN-6607A/B Two-Component Potting Silicone Gel is a very soft, low cross-linking density addition potting silicone gel. It is a low viscosity liquid before vulcanization.

The inverter glue dispensing machine is a glue metering mixing potting device specially used for solar photovoltaic inverter glue filling.

The current mainstream silicone rubber potting adhesives can withstand a temperature range of -60° to 150° and have passed the UL94 V-0 flame retardant certification, providing ...

silicone potting compound is a two-component, room temperature curing, condensation dealcohol type silicone potting material. Self-leveling, high and low temperature resistance, excellent aging ...

Watch this video to learn about various dispensing, potting, bonding and sealing applications for the production of inverters!

Epic Resins offers a complete range of bonding, potting and encapsulating products for solar energy applications. Epic Resins products are designed for optimal thermal management critical in solar ...

XG-6100 MI silicone potting compound, with its soft gel and good thermal conductivity and waterproof performance, is aimed at micro inverters as the key solar photovoltaic components ...

We carry out developments individually for your specific requirements in the photovoltaic (PV) industry. In photovoltaic and solar thermal applications, once installed many components and modules have to ...

Organic silicon potting adhesive has very stable usability and is not affected by UV, high temperature, humidity, or ozone even in harsh environments.

The potting materials formulated at Epic Resins have a wide range of characteristics to address the specific needs of solar power electronics. In addition to our polyurethane and epoxy potting ...
