

“Join solar energy professionals, innovators, and policymakers at SolarPower Europe 2026 in Brussels, Belgium. Discover the latest trends in solar power technologies, sustainable energy solutions, and ...

How can your solar business thrive in a more flexible and electrified energy market? Join us at the SolarPower Summit 2025 on the 26-27 of March to explore these critical questions.

Are you traveling to Brussels for the event? Here are five things you can do to explore and experience the city during your stay. 1. Explore the historical center. Start at the iconic Grand-Place, renowned ...

Across the capital, there are numerous solar panel installations on the roofs of homes and large businesses. The number of installations has risen by more than 150% since 2019 and the ...

Europe is on the path to a sustainable future with a focus on solar power, flexibility, and electrification. Discover how these strategies could shape the region's energy landscape by 2030.

In 2017, nearly 63% of solar power installed in Belgium consisted of small systems under 10 kW, mostly residential rooftop solar PV. Larger systems over 250 kW accounted for almost 20% of the total.

Brussels has invested in large-scale solar projects, including solar farms and solar parks, to generate clean electricity for its growing population. Moreover, the city is committed to making solar energy ...

At the SolarPower Summit 2026, we'll explore how solar and storage together can power every corner of Europe's economy - from buildings to defense, from data centres to agriculture.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 201 locations across Belgium. This analysis provides insights into each city/location's potential for harnessing solar ...
