

What happened to solar power?

Broken down, more than 86 gigawatts worth of utility-scale solar generation capacity was canceled, while the battery storage industry lost roughly 79 gigawatts of capacity, and 54 gigawatts worth of wind projects were slashed.

Which green energy projects have been hit the hardest by cancellations?

Cleanview's report found that green energy projects have been hit the hardest by the cancellations, with wind, solar, and battery storage projects making up 93% of the projects scrapped this year.

How many power projects were canceled this year?

In a report published Tuesday morning, Cleanview, an organization that tracks energy trends, found that, throughout this year, 1,891 power projects were canceled, with a combined generation capacity of roughly 266 gigawatts.

Why did new power projects get canceled in 2025?

Hundreds of new power projects set to be built over the next five years, including utility-sized solar farms and offshore wind farms, were canceled by their developers in 2025 because of the Trump administration's crackdown on renewables, pushback from local communities, and difficulties connecting to the broader grid.

The cancellation of \$1.4 billion worth of clean energy projects in May is indicative of a broader trend affecting the industry this year. The number of scrapped projects during the first five ...

Hundreds of new power projects set to be built over the next five years, including utility-sized solar farms and offshore wind farms, were canceled by their developers in 2025 because of the ...

President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Solar power is the fastest-growing source of new electric generating capacity in the United States, driven by large-scale solar photovoltaic (PV) projects built by electric utilities and ...

Companies have delayed or cancelled US\$14 billion in investments in clean energy projects in the US in the first four months of this year.

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending ...

From New York to California, state renewable electrical power dreams are collapsing. Power demands soar, while the federal government cuts funding and support for wind, solar, and grid ...

Clean energy manufacturers canceled, closed or downsized nearly \$8 billion in projects in the first quarter of

2025, as the Trump administration's rollback of support for the sector sets in. ...

The administration of U.S. President Donald Trump is canceling solar projects in Puerto Rico worth millions of dollars as the island struggles with chronic power outages and a crumbling ...

If solar energy is scrapped, the key actions involve 1. Exploring alternative energy sources, 2. Assessing the impact on the environment, 3. Understanding economic implications, and ...
