

At 140 MW in peak capacity, Karavasta is the biggest photovoltaic system in the region. It is about to begin delivering electricity to the transmission system in Albania. The largest photovoltaic ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's ...

Voltaia, an international player in renewable energies, announces the start of production of its 140 MW solar project, located in the Fier district of southern Albania.

Earlier this year, the state-owned utility OSHEE announced plans for five solar parks, each with a capacity of up to 50 MW, across the regions of Fier, Berat, Dibra, Gjirokastër, and Fushë; ...

Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a cumulative capacity totaling 235 MW.

Voltaia has started doing business in Albania in 2018 with the unsuccessful participation in the first solar tender organized by the Ministry of Infrastructure and Energy of the Republic of Albania ("MIE").

Developed by Voltaia, the 140 MW solar park was commissioned at the end of 2023 and is expected to generate 265 GWh of electricity annually -- enough to power approximately 220,000 ...

A company called Euron Solar-PV has submitted an application to the Albanian Ministry of Infrastructure and Energy for the construction of a 100 MW Solar power plant in the villages of ...

At EZ5 Energy, we don't just generate clean power--we engineer the future of solar. Since 2019, we've led Albania's solar transformation with high-tech support structures and integrated energy solutions.

Last week, French renewables developer Voltaia officially commissioned the Karavasta solar power plant, the largest solar installation in both Albania and the Western Balkans, with a total ...
