

Download standard contracts, which can serve as starting points to improve consumer transparency and reduce transaction costs.

The transaction agreed in a PPA has to be compatible with the regulatory and legal environment buyers and sellers operate in. Policy changes to emissions regulations, grid ...

We specialize in large-scale solar power generation, solar energy projects, industrial and commercial wind-solar hybrid systems, photovoltaic projects, photovoltaic products, solar industry solutions, ...

Decide whether to include solar + storage projects in a procurement based on storage benefits for addressing energy cost savings and/or resilience use cases at specific sites.

For distributed generation solar photovoltaic ("PV") installations, the "on-site" nature of the project is typically a far larger complicating factor than the intermittent nature of its output.

Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic (PV) systems.

System hosts may choose to sell the RECs associated with the on-site solar PV system and in their place buy RECs sourced from other geographically eligible green power resources in ...

"PV Plant Net Electrical Output" means the electrical energy discharged by the PV Plant, expressed in kWh, that is delivered by the Seller to the Purchaser at the Delivery Point at the PV Plant in ...

Wondering what drives energy storage cabinet equipment prices? This comprehensive guide breaks down cost standards, industry benchmarks, and purchasing strategies for commercial buyers.

Specifically, the Company must seek the necessary approvals to construct or purchase 16,100 MW of solar or onshore wind generation and 2,700 MW of energy storage capacity in the ...
