

Swiss Western Power Energy Storage Project

Western Power confirmed that the latest projects to have been granted offers include a 120MW solar-plus-storage project and a 100MW battery energy storage system (BESS).

Swiss energy trading group Axpo and local integrated energy solutions provider energieUri AG held a ground-breaking ceremony for two battery energy storage system (BESS) ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

A new pumped-storage station in one of the highest and remotest parts of Switzerland will help cope with fluctuations in wind and solar-power supply.

Switzerland's new EUR2 billion energy storage initiative isn't just another infrastructure project - it's a moonshot combining hydropower tradition with cutting-edge tech. Let's unpack why this ...

The energy storage provider INTILION and Axpo, one of the largest producer of renewable energy in Switzerland, have successfully completed the first joint project.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

Well, they're now making waves in energy storage. The Federal Council just launched Europe's most ambitious battery storage tender - a 900 MW capacity push to solve their Alpine energy puzzle.

"This project helps to stabilize the electricity grid in Switzerland and to optimize the management of our own energy and power capacity in Wettingen."
