

But the wind farm soon became a casualty of President Trump's efforts to slow -- and sometimes revoke -- federal approvals for wind and solar projects.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators added a record ...

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW installed. Combined, solar and storage accounted for 82% ...

Get the latest renewable energy news, trends, and insights on solar, wind, storage, and policy changes. Stay ahead with Factor This" expert coverage.

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

Canada's total wind, solar and storage installed capacity grew 56% since 2020, including more than 5 GW of new wind, more than 3 GW of new solar and hundreds of megawatts of new ...

Solar, wind and battery storage are forecasted to provide 99% of new electricity generating capacity in 2026 according to new data released by the Energy Information Administration.

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.
