

For over a decade, WINDSEEKER wind turbines have set the standard for affordable, reliable wind power. With its unique patented upward-furling design, the WINDSEEKER will dependably produce ...

Unlike many of our competitors, the Whisper controller includes a diversion load to ensure quiet safe operation of your wind turbine when the batteries are charged. It installs in minutes ...

High energy potential, even in low to moderate winds. The Whisper 200's 9-foot (2.7 m) blades create almost twice the swept area of the Whisper 100, and yield up to 200 kilowatt hours a month in a 12 ...

Electric power from a Whisper wind generator can easily provide the normal requirements of a sailboat, cabin, rural home, small farm or business without power lines. Solar panels complement the wind by ...

The Whisper 500 is a 3000-watt rated turbine that will deliver in excess of 500 kWh per month in a 12 mph wind. This machine has a 14-foot, 2 blade rotor providing 500 sq. ft. of swept area.

For over a decade, WINDSEEKER wind turbines have set the standard for ...

Whisper 100 provides dependable energy for remote homes, tele-communication sites and rural applications in moderate to extreme environments. Reliable operation by thousands of customers ...

The Whisper 500 is a 3000-watt rated turbine that will deliver in excess of 500 ...

Ultra-quiet wind turbine is designed to operate in a site with medium to high wind speed averages of 12 MPH and greater. Provides 100+ kWh per month (3.4 kWh per day) in a 12 MPH average wind. The ...

Unlike many of our competitors, the Whisper controller includes a diversion load to ensure quiet safe operation of your wind turbine when the ...

Most modern renewable energy systems combine a small wind generator with their photovoltaic panels. The purpose is to balance out the ever fluctuating solar and wind resources.

Whisper Wind Generators and Parts. Estimated kilowatt-hours (kwh) per month generated for each model at different average wind speeds (mph). Local conditions can change energy production. The ...

Exclusive to the Whisper, the side-furling Angle-Governor protects the turbine in high winds by turning the alternator and blades out of the wind, reducing turbine exposure.
