

How do you secure a wind turbine ladder?

For maximum safety in wind turbines, we offer you our rail and rope-guided fall arrest system solutions that have been tried and tested for decades. Simply fit the required ladder with a guide rail or safety rope and appropriate connections.

Can a guide rail fall protection system be used on a ladder?

The system is suitable for installation on any aluminum or steel ladder. The Guide Rail Fall Protection System can be used with the Fall Arrester SL-R60S, SL-R50E, and SL-R50. The Fall Arrester moves with the technician, travelling along the guide rail.

Should you use a ladder in a wind turbine?

Nowhere is safety in wind turbines more tangible than when using the built-in vertical ladders. Only high-quality, robust ladder systems ultimately create a feeling of safety that should be a matter of course. As the inventor of the aluminum ladder in Europe over 50 years ago, Hailo brought the professional ladder system to the wind turbine.

What is a ladder lifeline system for wind turbines?

MSA's range of Latchways®; Ladder Lifeline Systems for Wind Turbines provide outstanding personal safety for individuals accessing offshore or onshore wind turbines requiring the use of a fixed ladder.

Our Aluminum Ladders can be used independently or with a 3S Lift guide rail to mount a Climb Auto System or a Service Lift. Ladder Mounting The mounting supports for the 3S Lift ladder fasten non ...
