

See how GE Vernova's Wind business is creating and manufacturing its next-generation 3 MW workhorse wind turbine, and working together with customers to electrify and decarbonize the world.

Rush-Co offers innovative tarping and cover solutions for today's growing wind energy industry. An expert in cover design and manufacturing for over 50 years, Rush-Co manufactures customized ...

Leveraging over four decades of expertise, the EnVentus(TM) platform fuses our widest-applied onshore technologies. Advanced modularity enables easy customisation with reusable modules, tailored to ...

It is an object of the invention to provide a wind power installation for a nacelle of a wind driven power plant with a helicopter hoisting platform allowing the wind power...

Fassmer Composite: Lightweight, certified GRP/FRP nacelle & spinner covers with OEM integration and offshore wind readiness. Learn more today!

It enables turbine OEMs to easily upgrade from the DF concept to full converter (FC) operation. Reliable and cost-effective, the platform covers all MW class turbine sizes and delivers a proven route to the ...

Explore cutting-edge offshore wind turbine platform design by a seasoned wind turbine structural engineer for enhanced efficiency.

This paper discusses the motion and power generation mechanisms of a floating wind-wave power generation platform composed of multiple point absorbers and a semi-submersible ...

Custom turbine covers from Transshield shield wind energy equipment from corrosion, moisture, dust & scratching. Lightweight, easy to use & shrinkable designs.

Our product portfolio includes major and minor components, consumables, complete turbines, and repair services, that will help you to keep your turbines running efficiently, sustainably, and economically.
