

LHASA, Dec. 11 (Xinhua) -- China has achieved another breakthrough in wind power development at ultra-high altitudes, with the world's highest wind power project in Xizang Autonomous Region generating over 22 ...

To improve the power generation efficiency of wind farms through wake regulation, this study investigates yaw optimisation for wind farm production maximisation from the perspective of time...

The Xinglong 200 megawatt wind power project in Hexigten Banner, Chifeng, North China's Inner Mongolia autonomous region, was successfully connected to the grid at full capacity on March 26. This ...

See Xingxing Wind Power funding rounds, investors, investments, exits and more. Evaluate their financials based on Xingxing Wind Power's post-money valuation and revenue.

Xingxing Wind Power is a wind power generation and power supply service provider, mainly engaged in the preparation of wind power generation and power supply facilities.

Company profile page for Zhejiang Xingxing Wind Power Co Ltd including stock price, company news, executives, board members, and contact information

A record-breaking 20-megawatt (MW) offshore wind turbine has been connected to China's grid in the Fujian Province.

China is racing to develop a new generation of wind farms that can not only survive tropical cyclones, but also harness their power.

China has successfully completed the first flight of its home-designed floating wind turbine, the S1500, in Hami, Xinjiang. The system passed strict tests, including full desert assembly and...

These ultra-large turbines significantly improve wind energy efficiency and are equipped with smart operation and maintenance systems for remote monitoring and fault detection, making them well-suited for ...
